

THE SMART WAY TO TEST WATER.

Discover the next generation of water analysis with **Aquassist®**, where cutting-edge technology meets unparalleled ease of use. Our suite of smart devices is revolutionizing the way water testing is performed. **Integrated with an intuitive smartphone app, our system automates the testing process, delivering fast and accurate results with minimal effort.**

Integrated Device Suite

A full range of testing capabilities in one interconnected system for comprehensive water analysis.

Efficiency & Productivity:

Boosts operational efficiency and productivity, saving time and streamlining processes.

Automation and Simplification:

Eliminates manual testing, simplifying the process with automation for quicker, error-free results.

Peace of Mind

Delivers accurate and reliable testing data, ensuring confidence in every result.

Say goodbye to the tedious, error-prone methods of the past and welcome a future where smart, efficient water analysis is at your fingertips.

Avoid financial losses by reducing CO₂ emissions and waste of water.

PTA Testing:

- > Total Hardness
- > Calcium Hardness
- > Chloride
- > Sulfite
- > P, M Alkalinity
- > And others

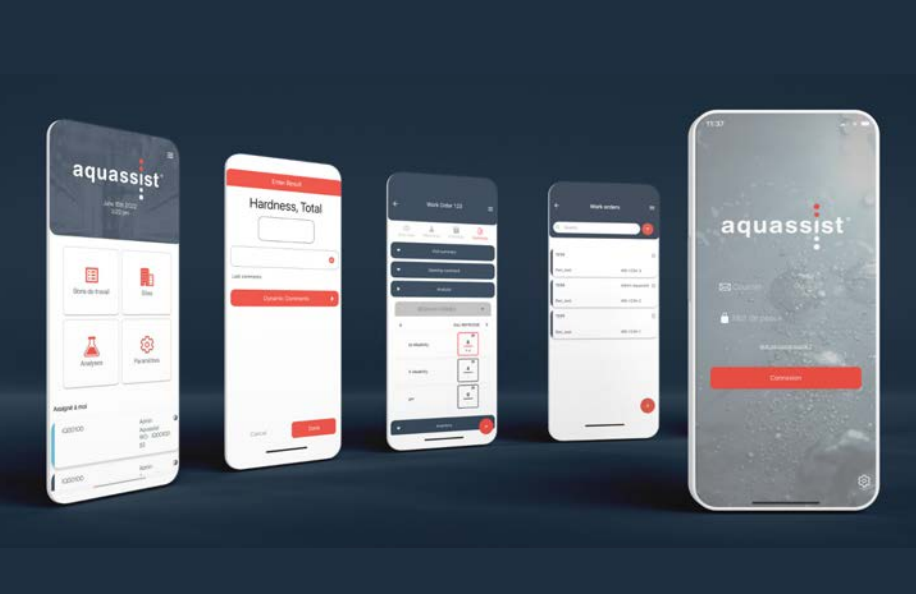

PSA

Featuring:

- > Broad spectral colorimetry
- > Fluorometry
- > Turbidity

Your Water Management Co-pilot:

- > Aquassist® reduces operators' learning curve.
- > Aquassist® supports operators in their water treatment tasks.
- > Aquassist® generates sustainable savings on time, energy and maintenance.
- > Aquassist® calculates environmental gains, such as reductions in CO₂ emissions and water consumption.

Aquassist by your side, every step of the way:

- > Proactive prediction with customized graphics interpretation and accelerated problem detection.
- > Simple training, rapid onboarding, ideal for new staff members.
- > Easy to use, intuitive interface and real-time support.
- > Automated and consistent testing.

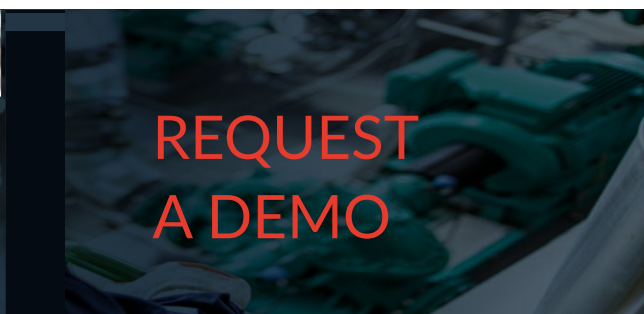

Embrace the evolution with Aquassist's® advanced water testing technology.

Our solutions emerge from a deep well of knowledge and a long-standing tradition of expertise, underpinned by a relentless pursuit of innovation. Discover unparalleled precision and simplicity in water analysis.

Contact us today to explore how our expertly crafted technologies can transform your process.

"With the Aquassist® app, we are able to save more time and the connected devices have allowed us to help streamline our water testing process. It gives me peace of mind that the test data is accurate."
